Harmonic Function Theory - Axler

This MATLAB function returns the probability density function (pdf) for the one-parameter distribution family specified by 'name' and the distribution parameter A, evaluated at the values in x.

Probability density function - MATLAB pdf

The distortion is a simple rotation of just 17 degrees, but the results are not very nice at all. First of all each new pixel location is a floating point value, but pixels can only exist in an integer grid, so the above simply junks the non-integer fraction of the results.

Distorting -- IM v6 Examples - ImageMagick

This paper studies the notion of W -measurable sensitivity in the context of semigroup actions. W -measurable sensitivity is a measurable generalization of sensitive dependence on initial conditions.

In this section we will introduce logarithm functions. We give the basic properties and graphs of logarithm functions. In addition, we discuss how to evaluate some basic logarithms including the use of the change of base formula. We will also discuss the common logarithm, $\log(x)$, and the natural logarithm, $\ln(x)$.
