The Smart Grid (SG) is an emerging concept, which is in a testing phase in many countries. It is a relatively new perception that integrates electricity and communication on power system networks, which enable SG applications, mainly for the use of Renewable Energy Sources (RES).

Smart Grid and its future perspectives in Australia

The RSPS-Smart offers you an affordable alternative to the proven RSP switches. Like its "big brother", the RSP-Smart offers innovative redundancy methods with zero switchover times, thus ensuring a maximum level of stability for your production processes.

RSPS-Smart from Hirschmann

The smart grid is conceived of as an electric grid that can deliver electricity in a controlled, smart way from points of generation to active consumers.

The Internet of Things (IoT) is rapidly coming of age. Billions of devices are already Internet-connected. Standards and protocols are stabilizing. Increasingly, network professionals are being called upon to integrate real IoT devices and applications, and solve real problems with IoT technologies. IoT Fundamentals: Networking Technologies ...

The Tesla PowerWall is finally becoming available in South Africa, so I thought I'd do some calculations to work out payback periods.
