Health and Sustainable Development Meeting of Senior Officials and Ministers of Health Summary Report Johannesburg, South Africa 19-22 January 2002

Health and Sustainable Development - WHO

The two dimensions of the scenario framework are socioeconomic conditions and climate conditions, as shown in Fig. 1. The socioeconomic dimension includes the five SSPs, and assumptions about demography, economy, energy, agriculture, land use and air pollutant legislation are differentiated among the SSPs.

SSP3: AIM implementation of Shared Socioeconomic Pathways

The main outcome of the life-course approach to health is functional ability, which is the sum of the individual and environmental attributes that enable a person to be or do what they have reason to value. 10 Functional ability enables well-being at all ages and is interdependent with the realization of rights.

A life-course approach to health: synergy with sustainable

Multi-level (or multilevel) governance is an approach in political science and public administration theory that originated from studies on European integration.

National and International Anti-Poverty Strategies and Poverty Reduction. On this page, you'll find links to information from the Canadian national/federal perspective as well as selected related international links.

National and International Anti-Poverty Strategies and

MGI's mission is to help leaders in the commercial, public, and social sectors develop a deeper understanding of the evolution of the global economy and to provide a fact base that contributes to decision making on critical management and policy issues.

Our Research | McKinsey Global Institute | McKinsey & Company

Chemicals can be found in many of the products we use in our everyday lives. Some chemicals pose risks to humans and the environment. Under the Toxic Substances Control Act (TSCA) and the Pollution Prevention Act, EPA evaluates potential risks from new and existing chemicals and finds ways to prevent or reduce pollution before it gets into the ...

Chemicals under the Toxic Substances Control Act (TSCA)

Four key principles—accountability, transparency, participation, and inclusion—have in recent years become nearly universal features of the policy statements and programs of international development organizations.

Accountability, Transparency, Participation, and Inclusion

MOST is UNESCO's intergovernmental science programme on social transformations. MOST works with governments, social and human science communities and civil societies to improve connections between knowledge and action, connections that are one key to positive social change.

Management of Social Transformations (MOST) Programme

Enabling environments for climate-smart agriculture (CSA) are the framework conditions that facilitate and support the adoption of climate-smart technologies and practices.

Enabling environments | Climate-Smart Agriculture Guide

One of the economic aspects of climate change is producing scenarios of future economic development. Future economic developments can, for example, affect how vulnerable society is to future climate change, what the future impacts of climate change might be, as well as the level of future GHG emissions.
